Established in 1999 to provide general practices nationwide with a choice of accreditation provider, QPA continues to deliver Australia's only specialist GP accreditation program. With a commitment to supporting outstanding general practice, QPA provides you with dedicated support and innovation to fully engage with your practice throughout the quality improvement cycle. Our unique pre-survey program, and support from our dedicated Quality Accreditation Managers, is designed to provide your practice with extensive support and feedback during your preparation for the survey visit. QPA delivers its renowned GPA Accreditation Plus accreditation program via GPA Connect: an innovative, intuitive and unparalleled system that brings all accreditation management processes online. QPA is the only GP accreditation provider itself accredited by JAS-ANZ and ISQua, demonstrating our commitment to our own quality assurance and improvement, and giving us an intrinsic understanding of the accreditation process, which in turn allows us to better support your practice.
