At IP Health we believe information should be used for a higher purpose - and what higher purpose is there than to help others? We use technology to connect doctors, nurses, patients, carers and other health professionals with real-time, patient-centric, information, where and when it's needed. Our breakthrough architecture, makes it easy to integrate any health service, application, data or device, anywhere, into a bespoke patient-centric medical record. We're proud to be at the heart of world-leading hospitals like Queensland's Mater Hospital Brisbane, Victoria's Peter MacCallum Cancer Centre, and the Victorian Comprehensive Cancer Centre, Parkville. IP Health - Australian ingenuity, helping to improve patient care, and lower healthcare costs.
