AutoMed Systems is not just a digital tool, it will revolutionise the way you provide healthcare. Designed by an Australian GP for Australian conditions, the globally patented AutoMed System improves service standards in practice management. By using technology we tackle the challenges of efficiency, staff morale, high patient turnover and decreasing profit margins. A software solution offering the full range of reception functions including mobile and online appointments, check-ins, payments, realtime Medicare claims, follow-up appointments, SMS Services including reminders, callbacks and targeted campaigns and a revolutionary caller identification with an appointment book interface. The software evolves and responds to practice needs and delivers quality, efficiency, reliability and cost savings - all of the essential KPIs for a modern practice. Over 300,000 patients have used the AutoMed Systems with proven results, and we are continuing to improve the intuitive interface as more practices adopt this holistic system.
