Sysmex digital health solutions streamline the diagnostic data workflow. We specialise in solutions for pathology, laboratory and radiology services as well as regional and national systems for population health management and clinical care. Our priority is to provide clinicians with the tools they need to support decisions for patient care, and diagnostic services with quality systems to ensure every aspect of a diagnostic procedure or test is accurately processed. The NZ response to COVID-19 features an integrated solution of key software applications - at the heart of this is the Sysmex CDR - Eclair and our laboratory system Delphic. Our product portfolio includes: Eclair
HCLAB LIS
Delphic LIS
Delphic AP
