Solutions that fit your Radiology and Cardiology business now and in the future
OUR VALUE
We bring together a team of technology experts and best-in-breed solutions, to deliver optimal usability and performance for each customer. Focused on measurable outcomes and business process enhancements whilst providing expert support and advice across the service delivery lifecycle. From strategy and design through to transition, operation we are on that journey with you
OUR SERVICES
CDN help address individual business challenges by delivering technology consulting, professional services and best practice program and project management. We also offer a range of optimisation and managed services that allow customers to leverage our highly skilled people and our investment in advanced technologies and tools as if they were their own. We develop new and innovative products through our active research and development program
OUR CUSTOMERS
From single installations to complex Enterprise integrations across broad geographies our applications are robust and reliable. Supporting timely patient diagnosis, improving accuracy and efficiency CDN enables our customers to improve how health businesses deliver their services. Technology for better lives
