Level 2  
35 Clarence Street  
Sydney NSW 2000  
Australia

Phone: +61 2 9119 8800

HealthLink connects medical organisations across Australia and New Zealand and exchanges over 100 million clinical messages annually.

Our focus is to provide certainty to healthcare organisations that their patients information has been successfully handled. We enable the electronic delivery of pathology and radiology results, referrals, clinical documents and discharge summaries.

HealthLink provides a large managed security infrastructure and is a pioneer in the development of 'cloud-based' online forms technology that is used for ordering pathology services and for referring patients to hospitals and other secondary care services.
