ACTIVATE your virtual private practice VMORE Health has over 20 years experience in establishing specialist healthcare practices. We are committed to ensuring that practices are rapidly established within a best practice framework. Our 'fast-track' start up methodology ensures that marketing to referrers and seeing patients happens as soon as possible. Experience increased flexibility and access to the latest in innovative healthcare technologies. We understand that the leap into private practice can feel a little like preparing for a bungee jump. Our experience and expertise in both traditional and virtual private practice is extensive. Starting a traditional practice is a costly undertaking and outgoings need to be planned for and well considered. The VMORE model allows for low cost entry into private practice - with virtual start up costs being up to 80% less than establishing traditional practice.
