Butterfly Apps is a beautiful designed software and includes module-based applications designed for various clinical roles, such as setup nurses, scrub nurses, circular nurses and anesthetic nurses. Butterfly Surgeons Preference Cards Suite is one of the most innovative suites which digitises surgeon's preference cards and automatically generates charge sheets. Prosthetic tracking becomes a simple and easy process like never before. Hospital executives gains surgery case costing in real time. Butterfly Inventory Management Suite allows clinicians manage purchase orders and stock takes so easily and it allows to save 75% of clinical time for managing non-clinical tasks. The technology also gain a huge popularity in veterinary hospitals, dialysis clinics and dental clinics.
