Cubiko is the leading practice analytics platform in the country, effortlessly combining all a practice's different data sources – Xero, Tanda and, Best Practice – into one easy-to-use platform to simplify task prioritisation, process improvement and profit growth. Because Cubiko was created by Doctors for Doctors, it gives you what you need: timely, accurate, and easy-to-understand data that provides meaningful insights into your practice. It keeps the most important things in your sight and in your mind. And it gives you those 'a-ha!' moments that enable you to respond to the complex problems you face. Practice management in a pandemic is no easy task. Introducing Cubiko Assist. Cubiko Assist is a distilled version of Cubiko incorporating 12 critical metrics from within Cubiko's existing practice support software. This vital dashboard will help you manage your business and care for your patients during COVID-19. Cubiko Assist is available to Australian practices at no cost is Cubiko's contribution to Australia's pandemic response. If you'd like to chat to someone who understands how to make practice data meaningful, then head to www.cubiko.com.au
