

Connected Health - Powered by Wavelink

Unit 1, 318 Auburn Road
HAWTHORN VIC 3122
Australia

Phone: 1300 147 000

By combining purpose-built smart devices with healthcare-specific applications, we can deliver a connected health experience. We achieve this by having a high level of engagement with clinical decision-makers, within healthcare organisations to determine the solution that meets their requirements. To aid us in the process, we collaborate with quality vendors like Spectralink, Alcatel Lucent Enterprise, Fortinet, Olinqua and SOTI. They provide us with the ability to build solutions such as staff duress, voice and secure text, vital sign monitoring, medication management, critical alert management and equipment location. The required applications sit either within our vendor ecosystem or our alliance relationships to ensure they operate seamlessly with our clinical smart devices.
