MediRecords is changing the way healthcare is delivered - for all. MediRecords utilises the best technology has to offer to deliver better patient care. For healthcare professionals and patients, MediRecords allows providers to focus on delivering better patient outcomes while empowering their patients with greater access. Founded in 2013, MediRecords was created to improve patient care while reducing costs associated with outdated technology. Through cloud technology, healthcare is accessible in real-time to all Australians with our suite of products. We work closely with our community members, patients, partners and fellow innovators to continue improving the way healthcare is delivered - for all. As industry pioneers, our forward thinking approach to healthcare technology is revolutionising patient care making MediRecords the only healthcare solution for every Australian.
