

Hyland Healthcare

Suite 3, Level 10
3 Spring Street
Sydney NSW 2000
Australia

Phone: 02 8249 4560

Hyland Healthcare delivers an integrated platform of technology solutions that streamline radiology workflows while connecting medical images and unstructured content to core clinical applications such as EHRs for system-wide access and sharing. The company's line of enterprise imaging solutions - including Acuo VNA, NilRead Enterprise Viewer; PACSgear Image Connectivity products and ImageNext, an intelligent workflow optimization solution - help healthcare providers centralize, manage and exchange both DICOM and non-DICOM images. Meanwhile, OnBase ECM (enterprise content management) offerings from Hyland make unstructured patient information (e.g. historical charts, referral letters, progress notes, clinical narratives, consents, claim information, etc.) centrally accessible to support both clinical and back-office efforts. With Hyland Healthcare technology, hospitals and health systems have better visibility into a patient's complete medical history, allowing them to make more informed decisions that enable patient-centered care and improve outcomes.
