We specialise in patient education. Our team has developed the largest library of patient experiences in Australia, Asia and the USA. We are experts in our field and our approach is guided by evidence. The content is compelling and engaging, and has a proven impact on self-efficacy and self-care behaviours. Our content distribution platform, GoShare Healthcare, is our flagship product. It enables health professionals to send customised content bundles to patients. GoShare makes it easy for the right information to be delivered to your patients at the right time. We are innovators in the delivery of online health programs, using GoShare Healthcare and webinar technology to provide scalable health education solutions. Our team has the experience to produce your next health communication. Bespoke content development is something we love to do - we address your brief, exceed your expectations, and deliver on time and on budget. How can we work together? License our content library for your own website. Subscribe to GoShare Healthcare to send customised bundles of resources to your patients, drawn from our content library and your own resources. Engage us to develop bespoke health resources (videos and animations). Engage us to develop and deliver health webinars or scheduled digital information programs for your patients, members or employees.
